

BUILD A MONSTER BUDDY!

1. All material needed to make this craft can be found in your craft kit:

2 pieces of felt – monster shape

pipe cleaners

googly eyes

pom poms

fabric (for stuffing)

1 “needle”* (made of pipe cleaners) with yarn attached.

*Note this “needle” may be a bit sharp at the end

2. Begin by ensuring both pieces of felt are placed together and that the holes match up. Tie a not through the same hole in both pieces of fabric, securing them together.

3. To begin sewing, use the needle to poke through the hole beside the one with the knot.

Please note that the needle can be used to widen or line up any holes in the fabric pieces. Just wiggle the needle through slightly and the felt can be reshaped.

4. After pushing the needle through all the way, bring it over the fabric and under again, through the next hole. Continue looping the yarn around (over and under).

5. Next you need to fill the monster with fabric stuffing. Stop looping the fabric together about 4 holes before the end to leave an opening for the stuffing.

6. Push the fabric stuffing through the opening.

7. Once stuffed, continue looping the yarn through to secure the fabric together. You should end in the same hole that you began in (the one with the knot).

8. Push pipe cleaners through the holes to make arms or legs – or whatever design you wish.

Use glue to add eyes, pompoms or any other decorations available.

Have fun and, remember, there is no wrong way to build your monster!
